REPLACEMENT FILTER SOURCING GUIDE

Heavy-Duty Filter Cross Reference Guide

A practical buyer resource for checking GUOHAO replacement filters by part number, filter type, cross-reference brand and application. Use it to prepare sample requests, OEM/private label discussions and import purchasing checks.

Important note: Brand names and part numbers are used only for replacement identification and compatibility checking. They do not imply trademark ownership, authorization, or official catalog publication by those brands. Always verify dimensions, sealing, media and machine conditions before ordering.

How to Use This Guide

1. Start with the part number

Compare the filter currently installed on the machine with OEM numbers, aftermarket numbers and any superseded references from maintenance records.

2. Confirm physical fit

Check length, outside diameter, inside diameter, thread, gasket, sealing surface, installation clearance and flow direction.

3. Match operating conditions

Review dust load, fuel cleanliness, hydraulic pressure, oil change interval, vibration, temperature and machine duty cycle.

4. Prepare an inquiry

Send part numbers, photos, drawings, required quantity, destination market, sample requirements and packaging or private-label needs.
